
Rochester Commercial Nurseries.

Established 1830. Since 1858 under the present Proprietor.

WM. S. LITTLE'S

Semi-Annual Circular

OF

WHOLESALE PRICES

FOR THE

SPRING OF 1884.

1866
ADVERTISEMENT.

On the following pages we enumerate those articles that we offer for sale in considerable quantities at wholesale rates. The present stock is large and complete in assortment, but in view of the short supply of some articles, and the increasing demand for all kinds of nursery stock, I invite early orders.

We publish a full Descriptive catalogue (retail) of Ornamental Trees, Shrubs, Roses, etc., illustrated with fine colored plates, and numerous wood cuts; also a Descriptive Catalogue of Fruits. These are *free* to our customers; to others, six cents each.

We print in **FULL FACE TYPE**, in this Circular, some of the most desirable varieties, to which we desire to call special attention, on account of our large and excellent stock.

TERMS AND CONDITIONS OF SALE.

The prices quoted in this List are expected to apply only where the specified quantities are taken, except as follows; *five hundred* at the *thousand* rate, fifty at the hundred rate, and six at the dozen rate; and at these prices, in the case of fruit trees, etc., the *varieties* are to consist of leading popular sorts, such as we cultivate in considerable quantities. Whenever any long list of selected varieties shall be required, consisting of new or scarce kinds, higher prices will be charged, according to the nature of the order. See Descriptive Catalogue for lists of varieties cultivated.

TO CLUBS.—It will be observed that the *cost of large orders* is correspondingly low, and the advantage of forming Clubs to secure these low rates is apparent. But at these reduced prices we cannot undertake, for obvious reasons, to assort the Trees into numerous small packages for different persons. Every *variety* is tied by itself, and carefully and securely labeled.

PACKING.—This is performed in the most careful manner, by experienced workmen, who have been engaged in this department of our Nursery for many years past. In wholesale orders, the cost of boxes, etc., for packing will be charged in all cases as usual. The cost of packing amounts to about one dollar per hundred Trees of ordinary size. In small orders, the cost is greater in proportion. No charge is ever made for cartage.

TRANSPORTATION.—In furnishing Trees, etc., on the terms of this Circular we cannot be responsible for the accidents or delays of transportation. All articles after leaving the Nursery in good condition, are entirely at the risk of the purchaser. Except in case of accident or gross carelessness, our packages will endure the longest journey in perfect safety.

DEALERS WILL BE ACCOMODATED ON THE USUAL AND MOST LIBERAL TERMS, but no stock from other growers will be allowed to be brought on our packing grounds, unless by special agreement.

TERMS CASH, except by special agreement. On account of the perishable nature of the goods, *we decline to forward any orders C. O. D.*, unless the parties are well known to us.

THE EAST AVENUE HERDIC COACH runs every twenty minutes during the day, from the corner of State and Main Streets, in the city, to our office. Telephone connection with all parts of the city. Friends are cordially invited to visit the grounds.

Correspondence is invited from all those who are interested in purchasing or planting Trees, either in *large or small* quantities.

WM. S. LITTLE,
Commercial Nurseries,
ROCHESTER, N. Y.

ROCHESTER, February, 1884.

ROSES--A SPECIALTY.

Our stock of **ROSES** is as usual large and complete, especially of the **HARDY HYBRID PERPETUALS**, grown on their own roots, in the open ground. Of these we cultivate a choice list of varieties, selected mainly from the most vigorous growers. Besides these we offer some good budded plants, mostly of kinds that do not succeed on their own roots. These include some of the most beautiful varieties.—For descriptions we refer to our **ORNAMENTAL CATALOGUE**, and **CATALOGUE OF ROSES**.

We offer this season, our usual stock of **Two Year Old Plants**, of good size, which are always quite scarce in the market.

To those who desire to purchase in large quantities, to sell again, as well as to the amateur, we can offer *special inducements*.

PRICES.

	Per Doz.	Per 100.	Per 1,000.
Hybrid Perpetual , 1 year, very fine plants, leading sorts	\$2 50	\$18 00	\$150 00
2 years, extra	3 00	20 00	180 00
Selected newer sorts, (ordered by themselves) 1 and 2 years	4 00	25 00	
LEADING VARIETIES. —Anne de Diesbach, Baronne Maynard (white) Baronne Prevost, Belle Normande, Caroline de Sansal, Coquette des Alpes (white), Gen. Jacqueminot (largely), Joasme Hanet, Jules Margotten, Jno. Hopper, La France (in pots), La Reine (largely), Leopold Hausburg, Louis Odier, Mad. Ali. de Rougemont (white), Mad. Trotter, Mar. Forey, Paul Neron, President Lincoln, Prince Camille de Rohan, Pierre Notting, Alfred Colomb, Sydonie.			
Budded Plants —On Manetti stock, of the following sorts	4 00	25 00	
Alfred Colomb, Baroness Rothschild, Countess of Serenye, Gen. Washington, La France, Pierre Notting, Marie Bauman, Jean Souper, Prince Camille, Francois Michelou, Rosy Morn, Persian Yellow, Mabel Morrison, (finest new white.)			
Moss Roses , including SALET, GLORY OF MOSSES, PRINCESS ADELAIDE, etc.	4 00	25 00

Persian Yellow , (budded)	4 00	25 00	
Tree Roses , imported	10 00	60 00	
Young Roses , (largely H. P.'s,) in 2½ pots, a large assortment of best varieties, fine young plants.	2 00	10 00	75 00
By mail, postpaid	2 25		

NOTE.—We invite especial attention to these "young roses;" they are vigorous, healthy young plants in a growing condition, and after transplanting into good ground will form large, handsome bushes in a short time, and produce abundance of blooms.

Rochester Commercial Nurseries.

SPECIALTIES

AND

& NOVELTIES

FOR

SPRING, 1884.

We desire to call attention in this circular to a few articles of merit offered for sale this spring. Many of them are NEW and RARE—all of them very desirable and specially recommended to our customers, who we are sure will not be disappointed if they will try them. We have a good stock of all of them.

These articles are more fully described in our Descriptive catalogues.

A new edition of the ORNAMENTAL CATALOGUE (including roses,) has just been published, containing a beautiful colored plate of the Clematis "*Lanuginosa Candida*." These Catalogues—Fruit and Ornamental—will be sent to any address on receipt of six cents in stamps.

TO THE TRADE. We offer all articles herein mentioned, as well as others of our usual large assortment, on liberal terms. Correspondence solicited.

W. S. LITTLE,
Rochester, N. Y.

ORNAMENTAL TREES, ETC.

Beech, Purple-Leaved. Handsome, well formed specimens of this well known but comparatively rare tree. 4 to 5 feet, \$1 each.

Birch, Fastigiata (Pyramidal). Of compact, upright growth, in form resembling the Lombardy poplar; Very handsome and desirable. 8 to 10 feet, fine specimens, \$1 each.

Chestnuts, American and European. Should be more generally planted, as well on account of their beauty as ornamental trees, as for the favorite nuts that they produce. We have trees in our nursery of only a few years growth that produce nuts. 5 to 7 feet, 50 cents each.

Catalpa Speciosa. The Catalpa when in bloom is a splendid object to behold. It is growing to be a new favorite. 7 to 8 feet, 50 cents each.

HORNBEAM. A small sized tree of rigid, shrubby growth, yet thrifty and vigorous. The foliage is abundant and handsome, produced on innumerable small twigs. The leaves hang on the tree all winter after turning brown in the autumn, which is a great feature. *The tree can be readily trimmed into any form.* These peculiarities render it a BEAUTIFUL ORNAMENTAL HEDGE PLANT, one of the very best we know of. We offer nice thrifty plants, twice transplanted, of various sizes, at reasonable prices.

MAGNOLIAS. The Chinese Hybrid Magnolias are very beautiful. Their exquisite, fragrant blossoms are produced in early spring in countless profusion. They are particularly adapted for places of limited extent. We offer some *transplanted trees, really fine specimens*, many of them with *flower buds*, ready for immediate blooming. The transplanting process has produced an abundance of fibrous roots, and as we move these plants with *balls of earth which are wrapped in sacks*, there need be no loss in transplanting.

Mag. Speciosa. Very symmetrical in growth, and the most *profuse flowering* of all; white, purple inside; transplanted trees, \$1.50 each.

Mag. Conspicua. Pure white; transplanted trees, \$1.50 each.

Mag. Soulangeana. Purple and white; transplanted trees, \$1.50 each.

Mag. Lenne. (New.) Fine dark reddish purple, very large flower; transplanted trees, \$2.50 each.

Maple, Schwedler's. (*Acer Schwedlerii*). A purple-leaved variety of the Norway Maple. One of the finest acquisitions of recent introduction. The foliage is magnificent: in color a rich purple, the ends of the growing shoots bright red; tree vigorous and perfectly hardy—a great improvement on the old purple-leaved maple. Trees, 3 to 4 feet, \$1 each; 5 to 7 feet, \$2 each.

PRUNUS PISSARDII. (Purple-Leaved Plum). A splendid novelty, introduced from Persia. Perfectly hardy. Has stood two winters in our grounds unprotected. It is a small sized, elegant looking tree or large shrub, with black bark and rich purple leaves, which retain their bright color through the summer; the ends of the growing shoots are brilliant red. It is said to produce fair fruit. Price, \$2 each.

Hydrangea Paniculata Grandiflora. One of the finest of the new hardy shrubs. It is becoming very popular and should be in every garden. The blooms are magnificent. Fine plants, 40 cents each.

Spirea Aurea. Is the best yellow leaved shrub. It makes a fine contrast with the *purple leaved* shrubs. 25 cents each.

Wistaria Alba. (*White Wistaria*). This is a charming companion for the Chinese purple variety. It is quite rare. Price of nice young plants in pots, \$1 each; strong plants of the *purple* variety, 50 cents each.

NEW PERPETUAL MOSS ROSE, MAD. BLANCHE MOREAU.

A new moss rose. Pure white; buds very mossy and flower of good substance; growth very vigorous, and hardy. Promises to be a valuable acquisition. Price of good one year old dormant plants, \$1.25 each; well established pot plants, grafted, 75 cents each.

PÆONIA TENUIFOLIA.

This beautiful but quite rare Pæony should be better known. It is very distinct from other varieties. Quite dwarf, with beautiful fern-like foliage, and brilliant crimson semi-double flowers, the color of Gen. Jacqueminot rose, with bright yellow centre. Blooms two weeks earlier than other sorts. Price of strong plants, 50 cents each.

CLEMATIS.

We offer the following varieties of this now popular and beautiful climber. They are all very elegant. The Clematis is unsurpassed for garden decoration and is extremely easy of cultivation.

COCCINEA. This is quite distinct from the other varieties mentioned. Being herbaceous, it grows to a height of 10 or 12 feet in a season and is covered from July to October with a profusion of bright coral scarlet flowers, of the form shown in the cut. It is very elegant. 50 cents each.

Jackmanii. Of this well known variety we grow a large stock. It is unsurpassed for general cultivation. \$1 each.

Lanuginosa Candida. (See colored plate in catalogue.) One of the finest white sorts; flowers large and showy. \$1.

The Gem. Flowers large; color, delicate lavender blue.

Blooms early in summer; very elegant. \$1 each.

Fortunei. Flowers *double white*, peculiarly formed and quite fragrant. \$1.50 each.

Standishii. A vigorous, hardy sort, blossoming early in the season in great profusion; flowers dark purple. \$1 each.

Helena. Has large white flowers. \$1 each.

John Gould Veitch. Flowers large, double, bright lavender blue. \$1.50 each.

Lady Caroline Neville. Large, bright blue flowers, barred with purple; very elegant. \$1.50 each.

Lawsoniana. Rosy purple flowers with dark veins; large and distinct. \$1 each.

Tunbrigensis. Deep bluish purple; vigorous and very free blooming; a fine sort. \$1 each.

Belisarius. Light blue; an early flowering sort. \$1 each.

Rendatlerii. Large, bright purple. \$1 each.

A set including all the above described varieties, \$10.
